- Global sales network

## Services & Products:

- Training equipment
- Teaching materials
- Labs and workshops
- Textbooks and multimedia
- Examination materials
- Train-the-trainer, Consulting
- Manufacturing and development of teaching materials
- Turn-key solutions

Work-based Learning is a fundamental aspect of technical training – it helps learners to acquire knowledge, skills and competences which are essential in working life since they are close to the needs of industry.

With its products and activities Christiani is promoting and implementing this learning model. Christiani has been active in the field of technical vocational training for over 80 years and stands for high-quality, hands-on training and continuing education.

Christiani is further expanding its business abroad – our products are already used in more than 70 countries. As a consequence Christiani products are increasingly designed for an international market. The number of teaching materials in foreign languages is steadily growing thus supporting hands-on learning abroad based on the German dual system and its action-based didactic methods.

## A firm establishment in the region

Our company has been firmly anchored in Constance since 1936 and we wish to contribute with our daily work to make Constance with its universities an important knowledge center. With over 150 employees, we have become one of the most important 'job providers' in the region.

# Our Expertise: Technical Education right from the Beginning

With our didactic concepts and teaching materials, Christiani is present at all locations where education takes place. We accompany people on their lifelong journey of learning: from school, through company based training or university, to continuing training for skilled workers at any age.

Technical education right from the very beginning involves getting children and young people interested in the exciting topics of technology and engineering early on and then supporting them in choosing the correct degree course or career path.

## Christiani Academy

Well trained staff is the decisive competitive factor for every organisation. The path to success leads through constant study and advanced training – privately or as a company initiative. In this regard, Christiani offers more than 80 years of experience in continuing education and is one of the leading service providers today.

# Training Equipment and Teaching Methods

By means of our know-how and our wide product range, we have clearly developed into a complete supplier in the field of training and education. Our range of teaching materials primarily serves the fields of mechanics, electrical engineering, automation, automotive mechatronics and renewable energies. We provide complete solutions – be it a mechatronic laboratory, an electronics or metal training workshop or a facility for training in automotive jobs.

Whether for vocational institutes, colleges and universities or for small and medium-sized companies and major corporations: We offer to our customers guidance, conception, planning and execution as well as train the trainer courses.

As a single-source provider for technical training, our portfolio covers both the hardware for the training labs and the teaching materials prepared for the lessons. This conclusive overall concept contributes to a lasting learning success!

# Customised Training Labs From Planning to Implementation

Collaboration with well-known industry partners and educational institutions as well as our experience in technical training enable us to provide modern and practical training lab concepts.

The necessary steps include

- Analysis
- Planning
- Design
- Implementation
- Train-the-Trainer
- Evaluation

We train your training staff to the latest standards and show you the most effective ways to use our training systems and materials.
